AutoPage RS-900 or RS-1000. They are identical pieces, just different remotes. The RS-1000 comes with an OLED remote that can be recharged. I've charged mine twice in the last year. It sure beats changing the AAA battery every month. That, and it's one of the most reliable alarms I've installed in my 18 years under the dash.

manual intended for beginners explains the basic tools that can be used for creating page layouts, inserting forms and tables, and including graphics.

The study proposes a different understanding of the complex relationship between Europe and the Mediterranean Middle East and North Africa, it challenges the conventional wisdom on Europe's benevolent foreign policy and the image of 'Fortress Europe' alike.

This book examines how the European Union shapes the creation and change of regional institutions in other parts of the world.

This is the first book to provide a precise description of how companies can put purpose into practice. Based on groundbreaking research undertaken between Oxford University and Mars Catalyst, it offers an accessible account of why corporate purpose is so important and how it can be implemented to address the major challenges the world faces today.

This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. Unevenness and inequalities form a central fact of African economic experiences. This book challenges conventional wisdoms about economic performance and possible policies for economic development in African countries, using the striking variation in economic performance as a starting point. African Economic Development: Evidence, Theory, and Policy highlights not only difference between countries, but also variation within countries. It focuses on issues relating to gender, class, and ethnic identity, such as neo-natal mortality, school dropout, and horticultural and agribusiness exports. Variations in these areas point to opportunities for changing performance, reducing reducing inequalities, learning from other policy experiences, and escaping the ties of structure and the legacies of a colonial past. African Economic Development rejects teleological illusions and Eurocentric prejudice, criticizing a range of orthodox and heterodox economists for their cavalier attitude to evidence. Instead, it shows that seeing the contradictions of capitalism for what they are - fundamental and enduring - may help policy officials protect themselves against the misleading idea that development can be expected to be a smooth, linear process, or that it would be if certain impediments were removed. Drawing on decades of research and policy experience, this book combines careful use of available evidence from a range of African countries with economic insights to make the

policy case for specific types of public sector investment.

Offering a solid introduction to writing VBA macros and programs in Excel, this guide shows readers how to get more power out of Excel at the programming level.

Networks of Modernity: Germany in the Age of the Telegraph, 1830-1880 investigates the origins and impact of the communications revolution in nineteenth-century Germany, focusing on one of the most transformative technologies of the period - the electric telegraph.

A wide-ranging analysis of the impact on European freedom and equality of the Great Recession of 2008.

This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. Combating Fiscal Fraud and Empowering Regulators analyzes the impact of new international tax regulations on the scope and scale of tax evasion, tax avoidance, and money laundering. These are analyzed through an ecosystem framework in which, similar to a natural ecosystem, new tax regulations appear as heavy shocks to the tax ecosystem, to which the 'species' such as countries, corporations, and tax experts will react by looking for new loopholes and niches of survival. By analyzing the impact of tax reforms from different perspectives—a legal, political science, accounting, and economic one—one may derive an assessment of the reforms and policy recommendations for an improved international tax system. The ultimate goal is to combat fiscal fraud and empower regulators, in that line, this volume is intended for a broad audience that seeks to know more about the latest state of the art in the realm of taxation from a multidisciplinary perspective. The money involved amounts to billions in unpaid taxes that could be better used for stopping hunger, guaranteeing education, and safeguarding biodiversity, hence making this world a better one. Regulators can see this book as a guiding light of what has happened in the past forty years, and how the world has and will continue to change as a result of it. Combating Fiscal Fraud and Empowering Regulators is also a warning about new emerging tax loopholes, such as freeports or golden passports and visas, where residency can be bought in tax havens, even within the European Union. The main message is that inequality can and has to be reduced substantially and that this can be achieved through a well-working international tax system that eliminates secrecy, opaqueness, and tax havens.
