Lawn Mower Carburetor Repair | Briggs & Stratton

Push the hinge pin out of the carburetor body with a small pin or pin punch. Take care to tap only the pin to avoid damaging the carburetor body. Remove the float assembly, inlet needle valve and fuel bowl gasket. If your carburetor contains an idle mixture screw, remove it along with the spring

Carburetor Rebuild | Briggs & Stratton

Proper cleaning and maintenance will keep your Briggs and Stratton carburetor working well. A carburetor mixes fuel with air and sends that mixture into an engine to be ignited by a spark plug which drives the piston and produces the power output in an internal combustion engine. Problems with the carburetor can manifest in many ways including the engine not starting, idling low, idling high, sputtering, dying, and producing black smoke exhaust.

If the engine is emitting black smoke, this could mean that the air filter is dirty, the fuel could have gone bad, and/or the carburetor is flooded. Start by checking your air filter, if it looks okay, move onto replacing the gas. If the problem continues, refer to the following for cleaning/replacing your Carburetor.
