This is a Castle Learning Answer. If  $d + 12 = 15$ , then what is the value of  $-2(d - 8)$ ? Answer: 10 We determine the value of  $d$  in  $d + 12 = 15$  by subtracting 15 - 12. This leaves us with 3. Now we know that the  $d$  in  $-2(d - 8)$  is also 3. So we simply evaluate  $-2(d - 8)$ , and we should be left with 10.

Journalist Walls grew up with parents whose ideals and stubborn nonconformity were their curse and their salvation. Rex and Rose Mary and their four children lived like nomads, moving among Southwest desert towns, camping in the mountains. Rex was a charismatic, brilliant man who, when sober, captured his children's imagination, teaching them how to embrace life fearlessly. Rose Mary painted and wrote and couldn't stand the responsibility of providing for her family. When the money ran out, the Walls retreated to the dismal West Virginia mining town Rex had tried to escape. As the dysfunction escalated, the children had to fend for themselves, supporting one another as they found the resources and will to leave home. Yet Walls describes her parents with deep affection in this tale of unconditional love in a family that, despite its profound flaws, gave her the fiery determination to carve out a successful life. -- From publisher description.

Ten-year-old William receives a wooden model of a medieval castle as a gift. It has everything he could possibly want, right down to a miniature drawbridge, a portcullis and a silver knight. In this enthralling story that weaves the everyday problems of growing up with magic and fantasy, the castle introduces William to an adventure involving magic, a ferocious dragon, a wicked wizard, and his own personal quest, where courage will finally triumph over fear.

Everything for Early Learning for first grade provides activities to help children learn these essential concepts: -numbers -addition -subtraction -measurement -spelling -vocabulary -reading -writing This math and language arts workbook supports current state standards. With Everything for Early Learning, children start their educational journey equipped with skills for success!

Spot the differences puzzles are the ones where you are given nearly identical drawings and you must spot the eight differences. This book consists of 50 spot the differences puzzles. But it is more than just a puzzle book. Each of the 50 drawings is on a subject that students must know about: things like giving directions, taking a driver's test, going to see a doctor, going to a job interview or asking a question in class. Each unit is a self-contained lesson on one of these subjects. To begin with each unit is four pages long. Students are first given a single, error free copy of the drawing, with which they identify objects in the drawing and brainstorm vocabulary. Next your students read a paragraph which tells the story of the drawing. Now your students come up with a title for the unit. Page two has the two copies of the drawing, with and without missing items, and space to write down what they are. Following this are a variety of vocabulary exercises and word puzzles. There is a close dictation and each unit provides a couple of personal interpretation questions, as well. There is a complete answer key.

Describes suggested activities to accompany the reading of Anne of Green Gables.
