What is the signal triggering this motion come from the nervous system and not from the endocrine system?

Chapter 9 The Endocrine System - Chapter 9 The Endocrine ...

In the pituitary, then, cells of the central nervous system and the endocrine system meet and live as near neighbors. The endocrine system is highly complex, and its organs are many and varied. Some endocrine organs, such as the Ovary and Testis, have already been discussed. In this chapter, several of the major endocrine organs are illustrated by light and electron microscopy - the thyroid gland, the adrenal gland, and the pituitary gland.
