Disorder 100

Sher, Barbara - Autism
Awareness

A Brief Overview of
Sensory Processing.

Sensory processing is
the neurological process
that our brains follow to
take in and interpret
information from the

Disorder (SPD) is a condition in which the brain has trouble receiving and responding appropriately to information that comes in through the senses.

SPD can affect people in only one sense – for example, just touch or just sight or just movement – or in multiple senses.
