Veronica Roth, autrice della saga bestseller Divergent, ci racconta una delle scene pi ù intense del primo volume della serie - quella in cui Tris deve fare da bersaglio durante la lezione del lancio dei coltelli - ma questa volta il capitolo è narrato dal punto di vista di Quattro. Un'occasione imperdibile per entrare nella mente del tenebroso protagonista di Divergent e scoprire i suoi pensieri, i suoi segreti e i suoi veri sentimenti per Tris.

This book focuses on regulatory challenges of creating and sustaining freedom of speech and freedom of information two decades after the fall of the Berlin wall, in global, comparative context. Some chapters overview, others address specific issues, or describe country case studies. Instead of trying to provide an exhaustive assessment which in one volume might not reach deeper analyzes of contextual details, this book will shed light on and help better understanding of general challenges for freedom of speech and information through varying comparative examples and highlighting important regulatory questions.

This is a new edition of Peter Oliver's classic work Free Movement of Goods in the European Community (now, in the light of the Lisbon Treaty revisions "European Union") which has established itself as one of the leading works of reference on European law for practitioners and academics alike. Indeed, whether advising clients or preparing for teaching there is no European lawyer who can afford not to have a copy of this book close to hand. Concise, precise, and lucid, the book has become the first port of call for anyone seeking answers to questions about the foundations of free movement of goods in the EU. With specialist chapters written by leading academic and practising lawyers, including Peter Oliver himself, this edition has been extensively rewritten to take into account recent judgments from the ECJ, including important cases such as C-110/05 Commission v Italy ("trailers") and C-142/05 Mickelsson ("jet skis"), both of which relate to restrictions on the use of goods. It also takes account of all the recent European legislation and the impact of the Lisbon Treaty.

Inhaltsangabe:Abstract: The present diploma thesis was written in preparation for the annual Eucotax- wintercourse 2005 celebrated in Tilburg, Holland. At this international conference the main findings of the paper were presented und further elaborated in cooperation with students from other participating universities and important international tax experts. The aim of this diploma thesis is to analyze in great detail the relationship between the Free Movement of Capital and the other Fundamental Freedoms, that is to say, to answer the question whether there is a single theory characterizing the relationship or whether different criteria apply to the question of delimitation according to the Freedoms at issue. Provided that an analysis of literature, relevant law and case-law does not rule out the possibility of simultaneous application of various Treaty Freedoms, the question of relationship is considered at the level of the substantive scope and justifications with respect to transactions that combine aspects relevant under several Fundamental Freedoms. However, before proceeding to this core question it is necessary to elaborate on the basis of discussion. Therefore, the first chapter is dedicated to the structural approach to be used to discuss the four Freedoms in the following, second chapter. Thereby, the ongoing convergence of shape and structure of the Fundamental Freedoms will become evident. A detailed analysis of primary, secondary and case-law as well as the abundant range of literature concerning scope, structure and shape of the Fundamental Freedoms provides the basis for

addressing the core question of this thesis, the relationship of the Free Movement of Capital to the other Treaty Freedoms. This question is addressed in the main chapter three, which firstly, elaborates on the general question of whether a consistent and clear delimitation is actually possible and to what extent it is of practical relevance. Consequently, situations that could be addressed from the angle of various Treaty Freedoms are considered in view of the, in part, quite inconsistent case-law. Thereby, questions regarding the relationship and delimitation of the substantive scope of the Treaty Freedoms are discussed separately from issues concerning the application and possible interaction of diverging grounds of justification. Generally, the issue of relationship and delimitation is considered one of the most difficult questions regarding the Fundamental [...]

The leading textbook on the four freedoms, popular with students and academics alike. This authoritative text offers a unique balance of comprehensive, detailed coverage in a concise and readable style, providing a critical and thorough analysis of the key principles of the substantive law of the EU. An introductory chapter provides valuable context on the governance of the internal market, its evolution, and the theories behind its key principles. Each of the freedoms is then dealt with in turn, covering goods, persons, services, and capital, before moving on to discuss harmonization, the regulation of the internal market, and its future. Additional useful detail is captured in footnotes, while directed further reading lists provide support for independent study and research. This thorough coverage is fully supported by engaging case studies throughout the book which place the law in context, helping you to understand the complexities of the subject and exploring the practical implications of EU law. Diagrams, flowcharts, and tables offer further detail and illustrate key ideas and processes in an easily accessible format, while chapter overviews, chapter content lists, and a clear structure ensure readers remain on track and can find information quickly. The book is accompanied by an Online Resource Centre which includes: -an online chapter on the common commercial policy -an interactive map and timeline of the EU, plus video footage of key moments in its development -useful weblinks and further reading advice -a searchable table of equivalences for quick reference to article numbering changes For lecturers: downloadable versions of the figures from the book are also available for use in lectures and handouts.
