The Church and Her Children by Congregational Society Publishing, first published in 1875, is a rare manuscript, the original residing in one of the great libraries of the world. This book is a reproduction of that original, which has been scanned and cleaned by state-of-the-art publishing tools for better readability and enhanced appreciation. Restoration Editors' mission is to bring long out of print manuscripts back to life. Some smudges, annotations or unclear text may still exist, due to permanent damage to the original work. We believe the literary significance of the text justifies offering this reproduction, allowing a new generation to appreciate it.

Get up to speed with the fastest cars around!

The global crisis the automotive industry has slipped into over the second half of 2008 has set a fierce spotlight not only on which cars are the right ones to bring to the market but also on how these cars are developed. Be it OEMs developing new models, suppliers intergerating themselves deeper into the development processes of different OEMs, analysts estimating economical risks and opportunities of automotive investments, or even governments creating and evaluating scenarios for financial aid for suffering automotive companies: At the end of the day, it is absolutely indispensable to comprehensively understand the processes of auto- tive development – the core subject of this book. Let's face it: More than a century after Carl Benz, Wilhelm Maybach and Gottlieb Daimler developed and produced their first motor vehicles, the overall concept of passenger cars has not changed much. Even though components have been considerably optimized since then, motor cars in the 21st century are still driven by combustion engines that transmit their propulsive power to the road s- face via gearboxes, transmission shafts and wheels, which together with spr- damper units allow driving stability and ride comfort. Vehicles are still navigated by means of a steering wheel that turns the front wheels, and the required control elements are still located on a dashboard in front of the driver who operates the car sitting in a seat.

The all-color practical Build Your Own Sports Car provides all the information needed to build a road-going two-seater, open-top sports car on a budget, using standard tools, basic skills and low-cost materials. The down-to-earth text clearly explains each step along the road to producing a well-engineered, high-performance sports car, providing a learning experience in engineering and design - and opening up a whole new world of fun motoring. The Haynes Roadster, which has fully independent rear suspension, has been designed with the aid of CAD software to develop the chassis and suspension, resulting in a car with performance and handling to challenge many established kit cars and mainstream sports cars. The design is intended to make use of components sourced primarily from a Ford Sierra donor, although alternative donors are mentioned.

Includes list and diagram of 1969 Motor Vehicle Safety Standards Areas.

Every fascinating stage of the evolution of the stunning new Lotus Evora is explored in this fully comprehensive book, LOTUS EVORA - SUBLIME SUPERCAR. From its conception, through development, prototype testing, certification, production and on to the marketing of the car, every part of this captivating story is covered in depth. Produced with the full co-operation of Lotus Cars, who once again gave Coterie Press exclusive access to their photo archives as well as their employees, this book contains the reminiscences of virtually everyone involved in the concept, design and development of the Evora. Author Johnny Tipler was the only journalist invited to see and drive the Evora before it was launched to the press and public. With unprecedented access and surprising candor, he is able to describe in detail all of the development stages, through to the construction of the first production examples, culminating in the car's press debut in Scotland. His close involvement with Lotus, and their obvious enthusiasm for the Evora project, is reflected by the openness of all involved who tell him the full story behind this stunning new car.

The 356 was the first Porsche model. The coupes and spyders were a great success throughout the world and continued to be so throughout the model's life. The story of the Porsche 356, and the racing and rallying cars that sprang from it, is detailed in this text.Dimensions: 250 x 207
