Ideal for students, entry-level technicians, and experienced professionals, the fully updated Sixth Edition of MEDIUM/HEAVY DUTY TRUCK ENGINES, FUEL & COMPUTERIZED MANAGEMENT SYSTEMS is the most comprehensive guide to highway diesel engines and their management systems available today. The new edition features expanded coverage of natural gas (NG) fuel systems, after-treatment diagnostics, and drive systems that rely on electric traction motors (including hybrid, fuel cell, and all-electric). Three new chapters address electric powertrain technology, and a new, dedicated chapter on the Connected Truck addresses telematics, ELDs, and cybersecurity. This user-friendly, full-color resource covers the full range of commercial vehicle powertrains, from light- to heavy-duty, and includes transit bus drive systems. Set apart from any other book on the market by its emphasis on the modern multiplexed chassis, this practical, wide-ranging guide helps students prepare for career success in the dynamic field of diesel engine and commercial vehicle service and repair. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Through a carefully-maintained " building block " approach, this text offers an easy-to-understand guide to automotive, truck, and heavy equipment diesel engine technology in a single, comprehensive volume. Text focus is on state-of-the-art technology, as well as on the fundamental principles underlying today's technological advances in service and repair procedures. Industry accepted practices are identified; and, readers are encouraged to formulate a sound understanding of both the " why " and the " how " of modern diesel engines and equipment. Thorough, up-to-date treatment of diesel technology encompasses major advancements in the field, especially recent developments in the use of electronics in heavy-duty trucks, off-highway equipment, and marine applications. The text's primary focus is on state-of- the-art " electronic fuel injection " systems such as those being used by such manufacturers as Caterpillar, Cummins, Detroit Diesel, Volvo, and Mack. A systematic, structured organization helps readers learn step-by-step, beginning with engine systems, and working logically through intake/exhaust, cooling, lubrication, and fuel injection systems, highlighting major changes in today's modern engines.

This book discusses different aspects of energy consumption and environmental pollution, describing in detail the various pollutants resulting from the utilization of natural resources and their control techniques. It discusses diagnostic techniques in a simple and easy-to-understand manner. It will be useful for engineers, agriculturists, environmentalists, ecologists and policy makers involved in area of pollutants from energy, environmental safety, and health sectors.

An outback story of red dirt, kelpies and the future of a family farm. Life on the land is often boom or bust, forever at the mercy of Mother Nature. Aticia 'Teesh' Grey took on the manager's role on her family's West Pilbara cattle station a few years after picking up her first team of kelpies. Almost immediately she was faced with a severe and devastating drought that forced her to question everything she thought she knew about the fragile country of her home. Through the heartbreaking rollercoaster journey that followed, Teesh's loyal canine companions proved invaluable as she and her family worked towards securing the property's future. The versatility of these amazing dogs took the station in directions no one anticipated. In 2020, Teesh got the chance to showcase the potential of working dogs more widely. Joining the ABC TV series Muster Dogs, Teesh and four other farming families took on the challenge of training new kelpie pups and testing their worth on the properties they run. Through this experience they showed the bonds that are formed between human and dog and vividly demonstrated a positive environmental future for farming in rural Australia. This is a story of love, laughter, loss and hope, as Teesh finds her feet in an ever-changing world with the help of the dogs who have stood by her side through it all. PRAISE "Kick your boots off and settle in for a wild journey of love and heartbreak, from the most inspiring cattlemoman I know ..." Margareta Osborne, author and grazier "Evocative, authentic and freshly engaging account of pastoral life ... reads like a Wild West adventure story ... At the end of this journey Grey recounts her transformative shift to a regenerative agriculture approach that puts the landscape first so as to begin healing 'Country'. What is optimistically promised is a fuller, less stressful lifestyle and healthier, more productive livestock" Charles Massey, author and voice for regenerative agriculture
