In this dynamic analysis of the gender revolution, authors Anne Breneman and Rebecca Mbuh create a platform for scholars from a variety of cultures to reflect upon their experiences as women and men in gendered cultures and upon their visions of prospects for gender equality and empowerment. Conceived during the United Nation's Fourth World Women's Conference in 1995 and continued during the Beijing +5 conference in 2000, this work represents the culmination of a ten-year project involving women from China, Sweden, Korea, Cameroon, Indonesia, South Africa, and the USA. Organized in five parts--Beginning, Women Awakening, Women Arising, Hazards of Growing up Female, and Reflections and Prospects--Women in the New Millennium includes perspectives in the form of scholarship, historical narratives, and interview materials aimed at contributing to public awareness of the global nature of the gender revolution. With their analyses and examples of the expanding gender revolution, Breneman and Mbuh seek to stimulate an interdisciplinary, international dialogue that leads to the further creation of action plans and will ultimately contribute to the empowerment of women and the equality of women and men in the new millennium.

Population and Society: An Introduction to Demography is an ideal text for undergraduate, as well as graduate, students taking their first course in demography. It is sociologically oriented, although economics, political science, geography, history, and the other social sciences are also used to inform the materials. Although the emphasis is on demography, the book recognizes that, at the individual level, population change is related to private decisions, especially in relation to fertility, but also to mortality and migration. The text thus considers in some detail the role of individuals in population decision making. At the level of countries, and even the world, changes in population size have an important effect on the environmental and related challenges facing all of the world's inhabitants. Therefore, attention is paid to the broad implications of population growth and change.

Patriarchal institutions govern all aspects of women's lives: their minds, their bodies, and their souls. Additionally, they govern the ways in which women are perceived by others and the ways in which women perceive themselves. (Re) Interpretations: The Shapes of Justice in Women's Experience, is a collection of essays on language, religion, war, sex trafficking, and medicine the patriarchal structures that form the basis of western society and, thus, are in many ways inherently unjust. The essays illustrate the multitude of ways that women have found to work within and without these structures to create justice. Traditional theories of justice cast it as a cardinal virtue, unbiased and impartial. The essays in this book, however, remove justice from the abstract and return it to the specific: most of the essays use personal narratives to highlight the connections all people share. The women discussed here are challenging the authority of existing patriarchal narratives by telling their versions, and, thus, calling attention to and challenging their own political and social realities. Reflecting a focus on global connectedness and interdisciplinarity, the writers of these essays aim not only to raise questions, but also to show ways in which women are creating new pathways for themselves. Only by exploring solutions will women reclaim justice. From L.A. to Zimbabwe, women have stories to tell about their experiences of justice in the inherently patriarchal institutions of Language, Religion, War, Sex Trafficking, and Medicine. This relevant and thought-provoking collection captures the trials that women across the world face and the hope they create through their courageous actions. Through both personal narrative and factual overview, these essays emphasize that as people committed to justice, women must not simply raise the questions, but they must also explore solutions in order to reclaim justice for themselves, their daughters, their sisters, and their mothers.Contributors: Yifat Bitton, Stephany Ryan Cate, Jo Scott-Coe, Susan Dewey, Carmela Epright, Carmen Faymonville, Adam Gaynor, Pauline Greenhill, Denise Handlarski, Alison Jobe, Marc J.W. de Jong, Jodie M. This book sensitizes the reader to the fact that there is substantial disagreement within the academic community, and among policymakers and the general public, over what behaviors, conditions (e.g., physical attributes), and people should be designated as deviant or criminal. Normative conceptions, the societal reaction/labeling approach, and the critical approach are offered as frameworks within which to study these definitions. A comprehensive explanation of theory and social policy on deviance is constructed.
